Description:

American financial and political powers collide and conspire in a breakneck thriller from New York Times bestselling author Stephen Frey. Andrew Falcon Jr. is the youngest hedge-fund manager to make partner at a powerful investment bank on Wall Street. His career is soaring, and his financial future is secured. But with fortune comes a high price. Just as Falcon thought life couldn't get better, his niece Claire is kidnapped—yet her abductors have no interest in money. They want information. In exchange for Claire's safe return, Falcon must dig deep into his firm's affairs, uncovering secrets worse than he could ever imagine. He discovers a conspiracy tied to the US government—a rogue faction is manipulating the American people to establish a new order. Now facing impossible odds and a plot that goes all the way up to the nation's leaders, Falcon must

find a way to save not only his family but also his country.

I have enjoyed other novels by Frey but the political world portrayed in this one is painful. There are virtually no redeeming characters in the novel. He portrays a Clinton-esque President in his Hilton character with bizarre Leftist economic plans which result in opposition from Generals who are the love children of George Soros and Dr. Strangelove. This novel presents every tinfoil hat wearing conspiracy fantasy one can imagine on both the left and right. I found I couldn't root for any side in the conflict. This was a waste of time to read.
